☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority in written form.  
☐ furnished subsequently to this Authority in computer readable form.  
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for the said claims Nos.

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

**Re Item III**

**Non-establishment of report with regard to novelty, inventive step and industrial applicability**

This application contains 44 claims, 4 of which are independent having overlapping scope. The various definitions of the invention given in these independent claims are such that the claims are not concise contrary the requirements of Article 6 PCT. Moreover, lack of clarity of the application as a whole arises, since the plurality of independent claims makes it difficult, if not impossible, to determine the matter for which protection is sought. No meaningful report can be thus established on novelty, inventive step or industrial application concerning this application.
